汉风图纹 pgfornament-han v0.1

林莲枝、张晨南

v0.1 2017 年 12 月 28 日 https://github.com/liantze/pgfornament-han

摘要

利用 pgfornament 宏包可以在 IATEX 文件里便捷地画出十分典雅漂亮的、欧式风格的花纹。(详情请自行访问 http://ctan.org/pkg/pgfornament。)pgfornament-han 宏包的用意,正是为了尝试用 pgfornament 的已有机制,提供一些汉风的传统图纹。所有图纹均由张晨南以 CAD 程式定稿、TikZ 绘制,再由林莲枝转为适合 pgfornament 机制使用的宏包代码。

第一部分 基本用法

n 为图纹编号的话,最简单的用法是 \pgfornamenthan[color=red,width=1.5cm] {n}。也可以用 height 或者 scale 设定大小。注意图纹比例是不变的,因此只有最后给出的选项有效。此外 symmetry 参数可以实现 3 种镜像,v (垂直)、h (水平)、c (中心 = 垂直 + 水平镜像),画边框的四个角点时很好用。

TikZ 选项的应用:

\tikzset{pgfornamentstyle/.append style={draw=black,fill=red,line width=1}}
\pgfornamenthan[scale=2]{n}

以下是一些范例。

文本中的使用

\pgfornamenthan[color=blue,scale=0.2]{56}
\pgfornament[scale=0.3]{56}

TikZ 选项的应用

```
\begin{tikzpicture}[baseline={(current bounding box.center)}]
 \tikzset{pgfornamentstyle/.style={
            draw=Goldenrod,fill=Red,line width=1pt}}
 \node[fill=black,circle,draw=Red,line width=2pt,inner sep=-8pt]
    at (0,0) {\pgfornamenthan[scale=0.38]{56}};
\end{tikzpicture}
```

简单的边框范例

```
\begin{tikzpicture}[x=1pt,y=1pt]
           \tikzset{every node/.append style={inner sep=0pt,color=
           % \forall tikzset = \{pgfornamentstyle/.appendstyle=\{draw=Goldenrod,fill=Red,linewidth=1pt\}\}
                  \node (nw) {\pgfornamenthan[scale=0.35]{1}};
           \node[anchor=north west,right=100 of nw] (ne)
                   {\pgfornamenthan[symmetry=v,scale=0.35]{1}};
           \node[anchor=north west,below=0pt of nw] (sw)
                  {\pgfornamenthan[symmetry=h,scale=0.35]{1}};
           \node[anchor=north east,below=0pt of ne] (se)
                  {\pgfornamenthan[symmetry=c,scale=0.35]{1}};
                              pgfornmanet
                                                                                         \draw (A) to[ornamenthan=19] (B)
                                                    tikz
                                                                             xscale
                                                                                                                                             \protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\protect\pro
                                                                                                                                                                                                                    scale
                   scale
           \node[anchor=north west,xscale=1.45] at (nw.north east)
                  {\pgfornamenthan[scale=0.35]{29}};
           \node[anchor=south west,xscale=1.45] at (sw.south east)
                   {\pgfornamenthan[scale=0.35]{29}};
     \node[font=\kaishu,align=center,xshift=50,text=black] at (nw.south east)
                                                                                   11
                                                                                 11
                                                                                                                                                        };
\end{tikzpicture}
                                         给我一片海棠红啊海棠红
                                                       血一样的海棠红
                                         沸血的烧漏是乡愁的烧漏
                                         给我一片海棠红啊海棠红
```

```
另一个简单的边框范例
\begin{tikzpicture}
  \tikzset{every node/.append style={
                                        ,inner sep=0pt}}
 \node (nw) {\pgfornamenthan[scale=0.25]{12}};
 \node[right=50bp of nw] (ne) {\pgfornamenthan[scale=0.25,symmetry=v]{12}};
 \node[below=50bp of nw] (sw) {\pgfornamenthan[scale=0.25,symmetry=h]{12}};
 \node[below=50bp of ne] (se) {\pgfornamenthan[scale=0.25,symmetry=c]{12}};
                    200bp,
                                                                      xscale
    scale=0.25
                               50bp
                                                                                xscale
 \node[anchor=north west] at (nw.north east) {\pgfornamenthan[scale=0.25]{32}};
 \node[anchor=south west] at (sw.south east) {\pgfornamenthan[scale=0.25]{32}};
 \node[anchor=south west,rotate=-90] at (nw.south west) {\pgfornamenthan[scale=0.25]{32}};
 \node[anchor=south east,rotate=90] at (ne.south east) {\pgfornamenthan[scale=0.25]{32}};
 \node[anchor=center,
                          , shift={(25bp, -25bp)}] at (nw.south east)
    {\pgfornamenthan[scale=0.5]{57}};
\end{tikzpicture}
```

```
有些部件衔接可能需要手动 shift

\begin{tikzpicture}\tikzset{every node/.append style={ ,inner sep=0pt}}
\node (nw) {\pgfornamenthan[scale=0.2]{23}};
\node[right=53bp of nw] (ne) {\pgfornamenthan[scale=0.2,symmetry=v]{23}};
\node[anchor=north west,xshift=2bp] at (nw.north east) {\pgfornamenthan[scale=0.2]{41}};
\node[anchor=north east,xshift=-2bp] at (ne.north west)
\{\pgfornamenthan[scale=0.2,symmetry=v]{41}};
\end{tikzpicture}
```

框着整个页面的代码。很适合拿来设计奖状证书的有木有!

```
\tikzset{every node/.append style={inner sep=0pt,
                                                         }}
\begin{tikzpicture}[overlay,remember picture]
\node[anchor=north west,shift={(14.5pt,-14.5pt)}] at (current page.north west)
  (nw) {\pgfornamenthan[scale=0.2]{25}};
\node[anchor=north east,shift={(-14.5pt,-14.5pt)}] at (current page.north east)
  (ne) {\pgfornamenthan[scale=0.2,symmetry=v]{25}};
\node[anchor=south west,shift={(14.5pt,14.5pt)}] at (current page.south west)
  (sw) {\pgfornamenthan[scale=0.2,symmetry=h]{25}};
\node[anchor=south east,shift={(-14.5pt,14.5pt)}] at (current page.south east)
  (se) {\pgfornamenthan[scale=0.2,symmetry=c]{25}};
\begin{scope}[start chain,node distance=Opt]
\node[anchor=north west,on chain] at (nw.north east) {\pgfornamenthan[scale=0.2]{47}};
\foreach \i in \{1, ..., 15\} {
 \node[on chain]{\pgfornamenthan[scale=0.2]{47}};
\end{scope}
\begin{scope}[start chain,node distance=0pt]
\node[anchor=south west,on chain] at (sw.south east) {\pgfornamenthan[scale=0.2]{47}};
\foreach \i in \{1,...,6\} \node[on chain] \{\pgfornamenthan[scale=0.2] \{47\}\};
\end{scope}
\begin{scope}[start chain=going left,node distance=Opt]
\node[anchor=south east,on chain] at (se.south west) {\pgfornamenthan[scale=0.2]{47}};
\foreach \i in \{1,...,6\} \node[on chain] \{\pgfornamenthan[scale=0.2] \{47\}\};
\end{scope}
%
%
           chains
                                                     \foreach
               (47)
                        155.
                                   scale = 0.2
\foreach \i in \{0, ..., 21\}
 \node[anchor=south west,rotate=-90,shift={($\i*(31bp,0)$)}] at (nw.south west)
    {\pgfornamenthan[scale=0.2]{47}};
\foreach \i in \{0, ..., 21\}
 \node[anchor=south east,rotate=90,shift={($\i*(-31bp,0)$)}] at (ne.south east)
    {\pgfornamenthan[scale=0.2]{47}};
%
%%
                   \fint fancy foot
\node[yshift=32pt,
                       ] at (current page.south) {\pgfornamenthan[scale=0.14]{51}};
\node[yshift=32pt,text=black] at (current page.south) {\large\thepage};
%
\end{tikzpicture}
```

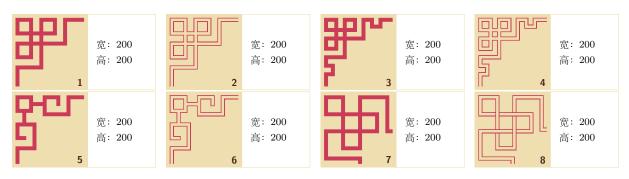

第二部分 纹样列表

以下部件的原宽度、原高度皆以 1bp 为单元。

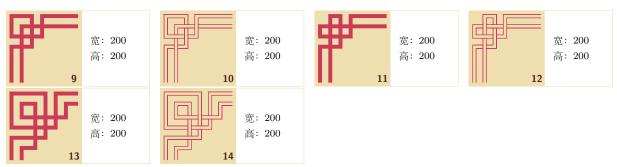

1 角点符号

1.1 接单线的角点符号

有实心线型与对应的空心线型两种。以下皆同。

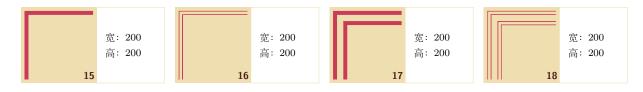

1.2 接双线的角点符号

1.3 简单角点符号

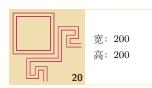

和其他角点符号配合,在一条对角线上使用其他角点符号,另一条对角线上使用简单角点符号。

1.4 回纹的角点符号

和连续的回纹配合。

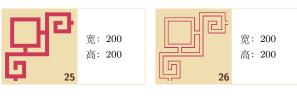

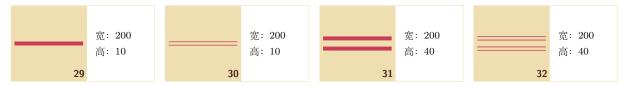

和离散的回纹配合。

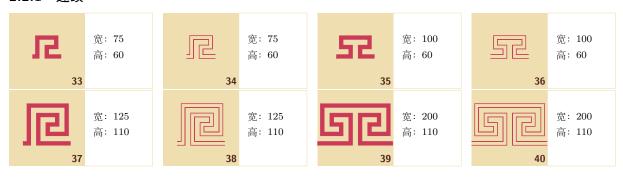

2 线型单元

2.1 单线、双线直线

2.2 回字纹

2.2.1 连续

2.2.2 离散

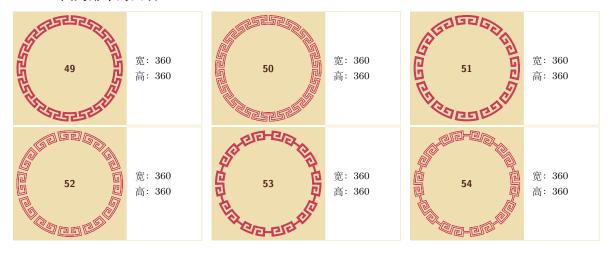

2.2.3 离散连接

2.2.4 圆周排布的回纹

3 吉祥纹路

3.1 福字纹

3.2 寿字纹
